

THE SAGE/PRIME GENTLEMEN MOVIE

Pillion presents itself as an immersion into the world of male submission within a gay biker subculture. To prove there's nothing gentle about true love, *Pillion* is the story of romance, devotion, and loss.

A naïve, inexperienced young gay man living with his parents in an anonymous city falls for the ultimate dominant alpha male – an impossibly handsome, strong, emotionally impressive biker who casually demands complete domestic obedience in exchange of the privilege of being anally penetrated with athletic vigor and a thrilling lack of sensitivity.

Pillion is a bold and daring film that pushes boundaries by portraying a BDSM relationship with honesty and nuance, never slipping into shock cliché. It blends awkward, funny, sensual, and serious moments in a way that feels natural and grounded. The restrained direction and minimal dialogue allow the dynamic to unfold quietly, with glances and pauses carrying real weight. The power balance and attraction feel lived in rather than exaggerated, making the story intimate and convincing. It may challenge some viewers due to the explicit BDSM sex scenes, but its confidence and authenticity make it stand out.
